E: dragoste.maican@gmail.com / P: [Portofolio](#) / L: [Linkedin](#)

I see myself as a technology and communication fanatic. I mainly focus my interest on Software Engineering. I am a great team player, that way I can ensure the quality of my work through all the stages of a software development project.

At the moment I am open to participate in solving the real problems of a corporate. Some of my passions are privacy, security and entertainment sectors.

## Experience

### **Full Stack Engineer (Intern), NTT DATA 2022 (March) - 2022 (June)**

Worked as a full stack software engineer, involved in the maintenance and updates of the corporate application using C#, JavaScript and Sharepoint 2013. Mentored by brilliant, hard worker members.

- Creating and updating microservices.
- Managing user permissions and workflow errors.
- Managing massive data loading problems.
- Participated in the system analysis, design and user manual of certain projects.
- Helped create new features for the corporate application.

### **Tech**

- JavaScript/Sharepoint 2013/C#/LinQ/Sql Server

## Education

IES Francisco Ayala (Granada) *Full stack Web Development and Design*

### **2017 (September) - 2018 (May)**

Modules covering full stack web development including:

- HTML, CSS, Scss, Bootstrap, Material UI
- Core programming skills using JS/Node
- One year Experience using Java
- React/Angular/Vue/Express
- Node
- MongoDB, Firebase, MySql

What have I done:

- Created many interesting applications using Java and JavaScript.
- Worked on many projects, using Vue, Express, Angular and React.
- Designed many projects using UI Material and SCSS.
- Learnt and worked in all stages in the creation of dynamic applications.

- Utilised various database providers such as Firebase, MySql, MongoDB.
- Introduced to SEO.
- Worked with both functional and OOP programming.
- Worked with Sockets and Firestore for a live information experience.
- Created a few games where I applied physics to the objects
